SUMMARY

I am a result driven Business IT professional with 2+ years of experience delivering digital solutions, first-line technical support, and data-driven insights in fast-paced enterprise environments. Demonstrated ability to troubleshoot system issues, support ERP and business applications, conduct UAT, and ensure compliance with governance and audit standards. Experienced in multi-country support operations across African markets, with a proven track record of automating workflows, resolving digital channel issues, and maintaining audit-ready processes.

EDUCATION

BSc. Business with Information Technology

Mount Kenya University | 2020-2023

WORK EXPERIENCE

FACTORY SUPPORT DEVELOPER

Sight and Sound seconded at British American Tobacco (BAT), Kenya | July 2025- Present

Responsibilities and duties performed

Digital Channel Support & ICT Operations

- Provided frontline ICT support to staff across East and Southern African countries, responding to digital channel queries, application incidents, and system access issues via ServiceNow ticketing platform.
- Delivered first and second-line investigation, diagnosis, and resolution of user incidents.
- Supported and configured end users on standard and business applications; proactively escalated major technical issues to IT management and followed up with users on progress and workarounds.
- Utilized SAP to raise and manage tickets for users requiring specific system roles, ensuring efficient and auditable handling of access requests.
- Contributed to the strategic transition from shared folders to SharePoint, significantly enhancing data management, accessibility, and collaboration across departments.

Digital Solutions & Power Platform

- Designed and developed scalable business applications using PowerApps, optimizing workflows and enhancing cross-department collaboration.
- Built and maintained interactive Power BI dashboards connected to enterprise data sources, enabling real-time visibility and strategic decision-making for operational and management reporting.
- Led the automation of complex manual processes through Power Automate, driving operational efficiency and reducing processing errors across business units.
- Partnered with business stakeholders to analyze requirements, map processes, and translate needs into technical solutions using the Microsoft Power Platform.

Key Achievements

- Reduced order processing time by 83% through the design and implementation of an OR Optimization Dashboard, significantly improving operational efficiency in South Africa.
- Developed and deployed a full-stack technology solution for reporting EHS concerns and near misses,

eliminating reliance on costly third-party systems and driving substantial cost savings in Kenya.

- Automated defect tracking processes while preserving historical data integrity, enabling real-time visibility of system metrics and data-driven decision-making for continuous improvement in Zambia.
- Played a key role in defending the Zimbabwe IT audit by ensuring the End Markets processes complied with global operating procedures, which contributed to achieving a satisfactory audit rating and strengthening governance standards

DIGITAL SOLUTIONS INTERN

British American Tobacco, Kenya | June 2024- June 2025

Responsibilities and duties performed

- Developed custom business applications using PowerApps, enhancing workflow efficiency and user accessibility.
- Automated manual business processes with Power Automate, improving accuracy and reducing turnaround time.
- Designed and deployed Power BI dashboards integrated with live business databases, delivering real-time insights and faster decision-making.

Key Achievements

- Designed and implemented an automated mail order process, to raise and track requests in real time, reducing order fulfilment pickup time from several hours to under 1 hour, which has eliminated manual bottlenecks and reduced manpower cost.
- Leveraged existing solutions through strategic knowledge sharing to design and implement a Quality Control Application that monitors environmental conditions, enabling data-driven decisions on product shelf life and ensuring optimal product quality for consumer satisfaction

DATA AND APPLICATIONS INTERN

Dimension Data | Feb 2024- May 2024

Responsibilities and duties performed

- Developing applications for clients using PowerApps
- Automation of manual processes mainly using power platform
- Providing support on Microsoft products

IT INTERN

Naivas Supermarket HQ | May 2023- January 2024
